Gentlemen:

This office represents the Town of Omaha, Arkansas, and I have been asked to contact your company to express the Town's willingness to help in any way possible with the locating of your new plant in Omaha. Many rumors are going around the community, and one of them is that there may be a problem with the old Arkwood site. We understand that several tests have been conducted in the area around the site, and that the tests have been negative.

The Town obviously wants your company to locate the plant there and also wants to help if there is a problem with the site. The Town is in the dark about what is going on, but we would appreciate knowing if a problem really does exist and if there is some way for the Town to help, it will.

Omaha is looking forward to your company's addition to this area, and should there be any questions, please feel free to contact either Mayor Jake Arnold in Omaha, or this office.

Thank you.

Sincerely,

GRESHAM AND KIRKPATRICK
